Westland HVAC + Plumbing Announces Merger with Pompeii's Plumbing, Sewer, and Drain

Westlake, Ohio – Westland Heating & Air Conditioning, Northeast Ohio's 5-star rated HVAC + Plumbing company, announced its merger with Pompeii's Plumbing, Sewer and Drain. The addition of Pompeii's, a locally owned and family-operated plumbing company, expands Westland's current plumbing offering to now offer **24/7 emergency plumbing service** to all its customers and an expanded list of additional plumbing services that customers will enjoy having access to. This merger will present benefits for both customer bases as we will now be able to provide an expanded range of 24/7 emergency services for everyone.

"Pompeii's is a company that has been providing top-notch plumbing services in the Cleveland area since 1941. Both of our teams operate with the same values and business practices each day and that's how I knew I could confidently move forward with this decision to merge with Pompeii's. I knew I wanted to enhance our plumbing division with a company by our side that provides world-class service to their customers, just as we do with ours. This merger marks the continuation of an exciting chapter for Westland as we continue to grow and expand our plumbing offerings for our loyal customers." said Zack Mitchell, President of Westland HVAC + Plumbing.

"The merger with Westland is beneficial to both our customers and our employees. After serving our community for over 30 years, we are excited to merge with a company that holds the same quality standards, integrity, and ethics as Pompeii's. I will personally be a part of the merged company and look forward to serving our customers through our aligned services. This merger ensures the tradition of service and quality that our customers have been accustomed to for over 3 decades". Matt Pompeii, President of Pompeii Plumbing, Sewer and Drain.

This is an extremely exciting event for both companies, for their employees and their customers. Their greatest assets have always been their technicians and plumbers, and by joining forces they have made a huge increase in the quality of that asset for their customers.
